

Share information before, during and after a crisis
– for a common situational assessment

WIS

WIS is a platform for Sweden's civil preparedness. All municipalities, regions, county administrative boards and preparedness agencies are connected, as well as a large number of voluntary organisations and private actors with responsibilities during a crisis.

WIS – a digital system for
comprehensive situational
awareness

Collaboration
For efficient use of society's collective resources.

Mobile app
Stay updated and work anywhere, anytime.

Integrations
Integrate other systems through WIS APIs.

Security
Manage access control and permissions. Available over SGSI (Swedish Government Secure Intranet).

Distribution
800+ connected organisations reachable via the internet from any device, free of charge.

Operations
Proprietary, state-controlled platform with robust and redundant operating environment.

Monitoring
Information from several actors involved provide a comprehensive situational assessment.

Notifications
Stay informed with regular mobile and email updates.

Map
Visualise degree of impact and important geographic markers.

Log
Traceability and documentation during and after the incident.

Document management
Store, version control, review, process and register documents and other files, safely and securely.

Request information
Quick acquisition and compilation of information from many actors through controlled question types and templates.

WIS – a platform to share information before, during and after a crisis, and to acquire a common situational assessment
